

SriLankan Airlines, the National Carrier of Sri Lanka operates with a network of destinations throughout Asia, the Middle East, London and Melbourne. The Airline has a strong presence in Maldives and Southern India. SriLankan is a member of the 'Oneworld' alliance.

The SriLankan team is seeking for a dynamic individual to join us as:

HEAD OF ENGINEERING

The incumbent is responsible to provide leadership and strategic direction to ensure the availability of safe and airworthy aircraft for the services of SriLankan Airlines at optimum cost and productivity levels, in compliance with all regulatory requirements, quality and safety standards and service levels with regards to aircraft maintenance. The scope also includes providing maintenance and engineering services to customer airlines profitably.

Key responsibilities will include:

- Formulate and implement business strategy and operational plans covering all areas of Engineering and Maintenance of SriLankan Airlines and deliver strategic targets through optimum productivity and efficiency.
- Ensure that safety and quality requirements applicable to the Company and/or functions are formulated, activated, deployed as part of the operational system and monitored and evaluated as appropriate for continued effectiveness.
- Ensure that the SriLankan Airlines Engineering & Maintenance activities (CAMO, AMO & Supply Chain Management) conforms to all the conditions in the approved expositions and Procedure Manuals, Civil Aviation Authority Sri Lanka requirements and other applicable regulations and requirements, in compliance per the certifications held.
- Ensure that all operations in the area of responsibility for which the post holder is accountable is provided with the necessary resources and conducted in accordance with the Company's standards and when appropriate, with the relevant regulatory requirements of the Civil Aviation Authority of Sri Lanka.
- Maximize opportunities for revenue generation through third party maintenance.
- Provide leadership through strategic direction, people development to ensure a highly skilled and motivated Engineering management team to meet agreed goals and business targets and ensure continuity.
- Ensure implementation, monitoring, management and continuous improvement of the Business Continuity Management (BCM) covering all four sections of people, process, site and technology and provide strategic directions for managing business continuity under the post holder's purview. Ensure Department wide readiness to respond to a disaster situation and ensure that all employee's and third party's Business Continuity Management(BCM) roles are defined, assigned at all levels, implemented, tested and revised periodically in accordance with the Business Continuity Management (BCM) governance framework and quality assurance programme.

The applicants should possess the following minimum requirements:

Engineering Graduate from a recognized university with at least 15 years of work experience out of which 10 years of post-qualifying experience at Managerial level in commercial aircraft maintenance and/or aircraft engineering.

OR

Holder of Aircraft Maintenance Engineers license and multi-category aircraft type approval and at least 15 years of work experience out of which 10 years should be at Managerial level in commercial aircraft maintenance and/or aircraft engineering.

Be a Sri Lankan citizen.

Selected candidate is required to be based in Colombo, Sri Lanka.

Employment will be offered on fixed term contract.

Applications enclosing a CV and contact information together with names, contact details of two non-related referees and post applied for written on the top left hand corner of the envelope, should be sent on or before **29th June 2020** addressed to:

SriLankan Airlines, the National Carrier of Sri Lanka operates with a network of destinations throughout Asia, the Middle East, London and Melbourne. The Airline has a strong presence in Maldives and Southern India. SriLankan is a member of the 'oneworld' alliance.

The SriLankan team is seeking for dynamic individual to join us as:

MANAGER ENGINEERING MATERIALS & SUPPLY CHAIN MANAGEMENT

The incumbent is responsible to develop, organize and manage the Engineering Materials department including the Engineering Materials, Verification & Projects, Aircraft Component and Repairs, Procurement & Logistics sections, to provide most cost effective and efficient materials, procurement and logistics solutions to the Airline and Aircraft Maintenance organization whilst complying with industry standards and applicable regulations to enable Engineering and Maintenance division to achieve the required service levels for fleet operation and aircraft maintenance meeting applicable maintenance standards.

Key responsibilities will include:

- Manage all warehouses in an efficient and orderly manner ensuring storage of all engineering materials meets the applicable airworthiness standards and regulatory requirements of the Civil Aviation Authority Sri Lanka, EASA and other applicable authority standards.
- Design & formulate strategies, develop procedures, policies and guidelines in respect of all phases of handling engineering materials and guide the staff in order to carry out their jobs in an effective and efficient manner. Lean processes and organization to be developed.
- Guide the verification & project team in delivering the required output at the assigned timelines, while adhering to the Company policies and procedures, which also should be in line with the external & internal audit requirements. Conduct cyclic review of inventory stocks and launch follow up action.
- Provide cost effective solutions by evaluating Rotable, Repairable, Consumable and Expendable requirements and management options for the Airline and Aircraft Maintenance Organisation based on fleet plan and AMO maintenance plans.
- Plan and organize the materials management activities in a cost effective and efficient manner, to provide required service levels for supporting high standards of dispatch reliability, planned maintenance check turnaround times and agreed material support service levels.
- Co-ordinate with vendors/ original equipment manufacturers (OEMs) as/when required in order to obtain preferential terms and conditions, expedite supply of parts to meet Airline or AMO needs and timelines.
- Provide leadership to a multi-disciplinary team and ensure that they are motivated, capable and resourced to achieve performance objectives consistent with the Company values. Formulate and implement appropriate training programs for all staff under your purview (repair management/ inventory control/ verification/ engineering stores/ logistics) to ensure that they have necessary competencies to deliver their services whilst enhancing their capabilities.

The applicants should possess the following minimum requirements:

ICAO type two License holder in A&C or EI&R categories, with 10 years of Aircraft Maintenance/Aircraft Engineering experience including 08 years as a Licensed Engineer with a minimum of 03 years of experience at Managerial level.

OR

Holder of a Bachelor's degree in any Engineering discipline from a recognized university with 10 years of Aircraft Maintenance/Aircraft Engineering experience including 08 years post graduate experience with a minimum of 03 years' experience at Managerial level.

OR

Bachelor's Degree with 6 years overall work experience with 3 years at Managerial level and 3 years at Executive level in a relevant discipline.

OR

Full professional qualification with 6 years overall experience with 3 years at Managerial level and 3 years at Executive level in a relevant discipline.

Be a Sri Lankan citizen.

Selected candidate is required to be based in Colombo, Sri Lanka.
